

What are ISOP doing and what are we going to do about medication errors?

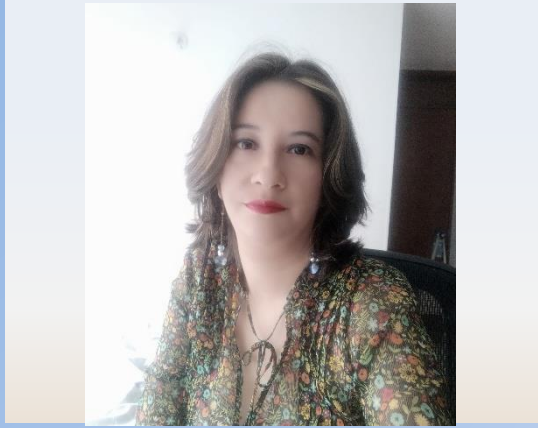

Dr Brian Edwards Co-Chair of
Medication Errors SIG and
Vice President ISOP

08.15 Tuesday 15th November 2022

International Society of Pharmacovigilance

Introducing the new ISoP Executive Committee

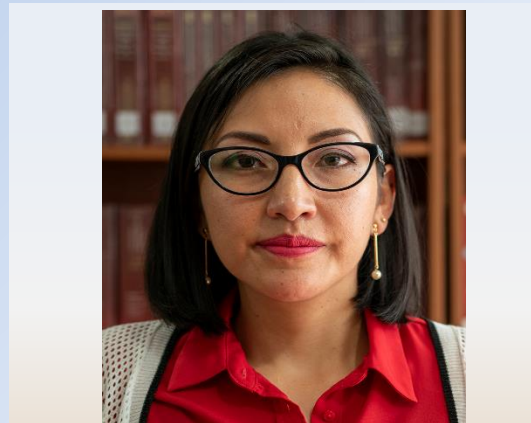

Angela Caro
President - Colombia

Brian Edwards
Vice-President - UK

Omar Aimer
Treasurer - Canada

Mónica Tarapués
Secretary General - Ecuador

Angela Caro

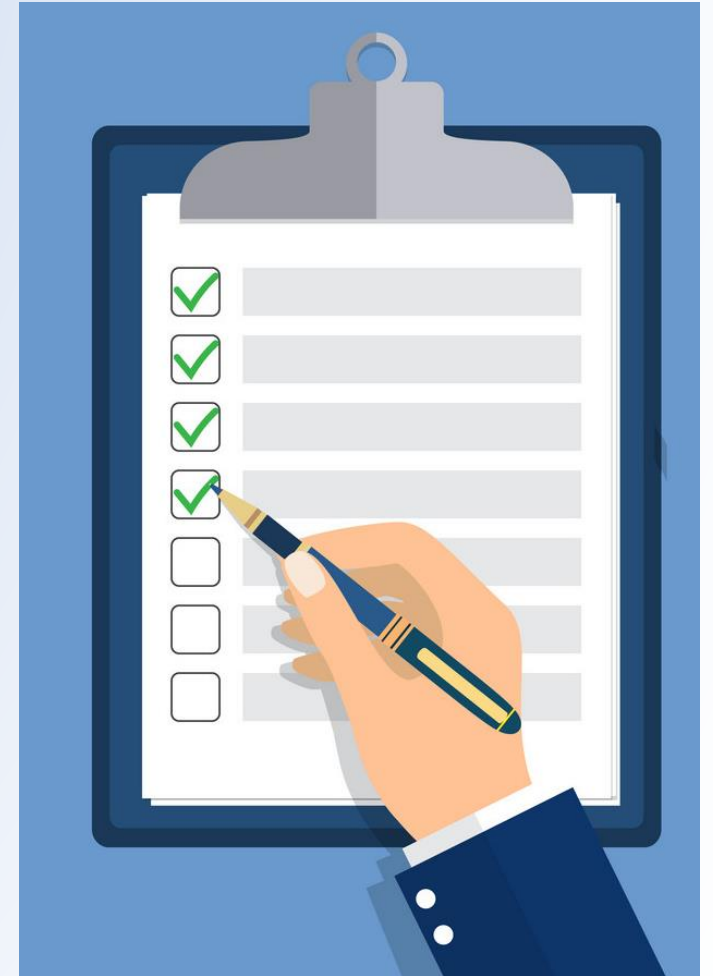

World
Patient
Safety Day
2020

Agenda

1. Medication Errors SIG in ISoP
2. Medication error and Human Factors
3. Guiding Principles: invitation to form a working group

ISoP Special Interest Group (SIG)

Special Interest Group

“a group of ISoP members acting as volunteers and working on a specific and relevant topic which is within the scope and aims of ISoP.”

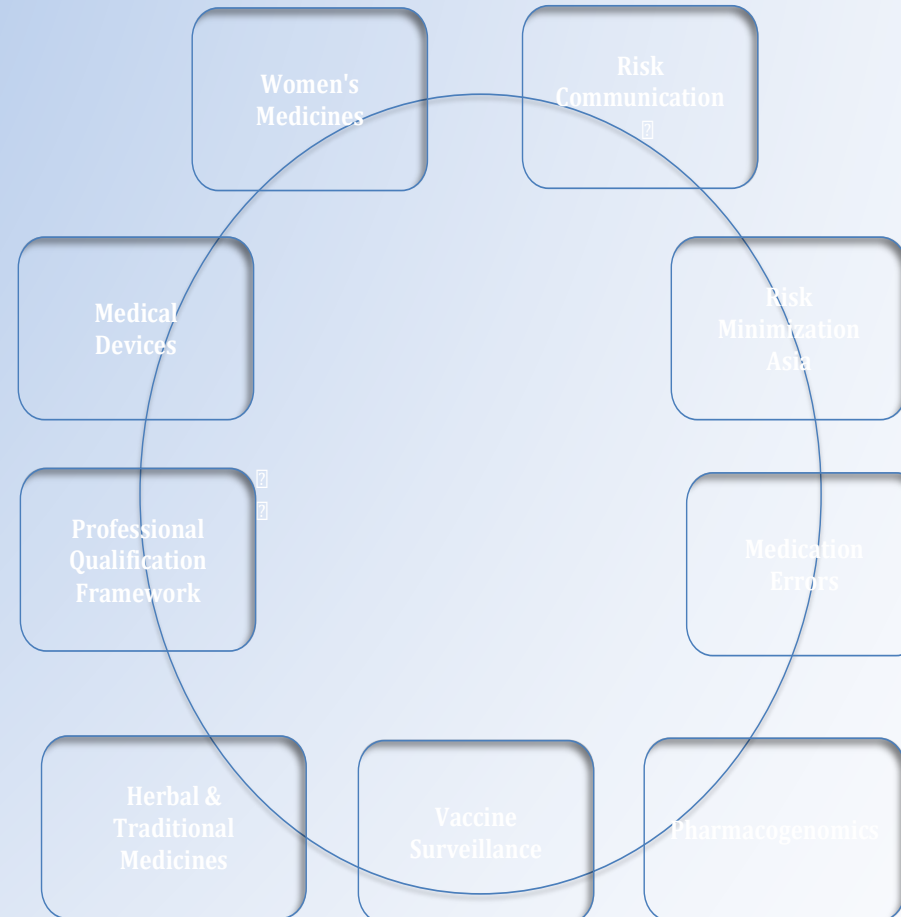

Recent addition:

Ecopharmacovigilance

Medicines and devices in the elderly

In development:

Safety of biological therapies in oncology

Medication Error SIG

- Monthly zoom calls
- Dedicated project manager keeps show on the road !
- Exchange news, events, serious safety issues
- Feedback from meetings
- Invited speakers on topics of interest or ongoing research
- Regional updates from ISOP chapters

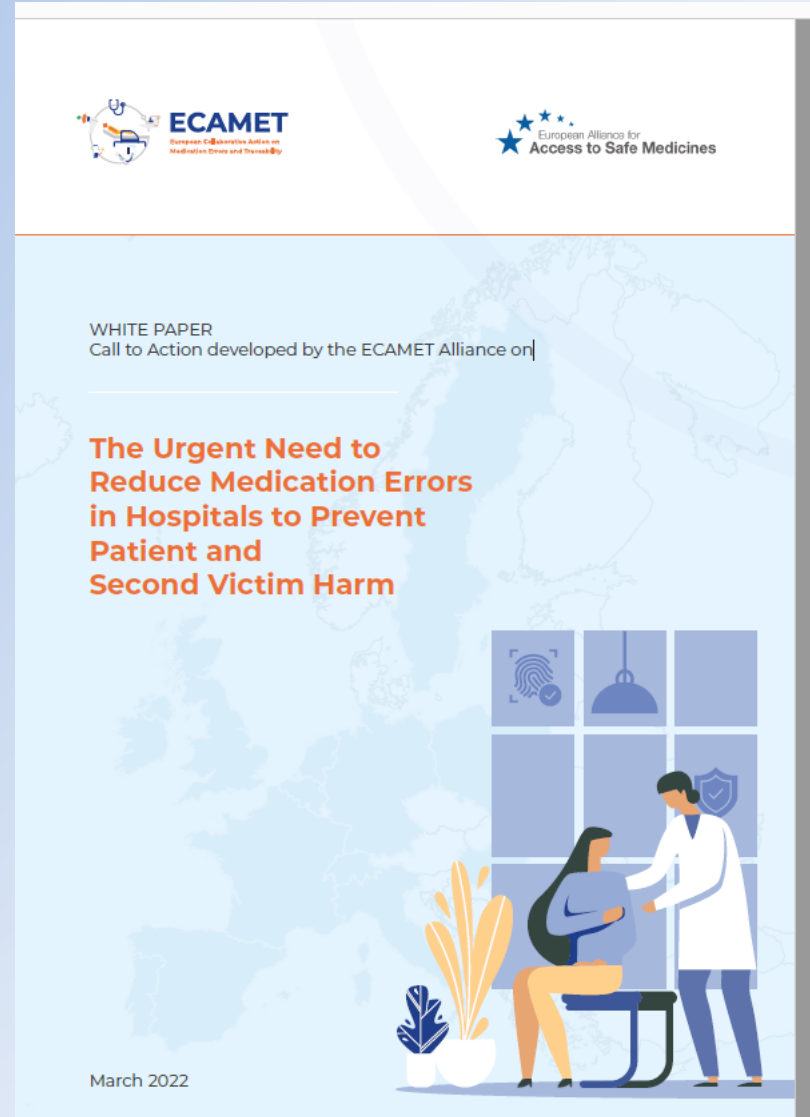

Current Projects Med Err SIG

- Promote Prescribing Safety Assessment (PSA) for British Pharmacology Society
- ISoP World Patient Safety Day 2022 Events / Medication Safety week (UMC)
- Infographics for easier risk communication - Social media impact
- Cultivate new groups: Pharmacogenomics, Ecopharmacovigilance, Elderly
- ME Coding MedDRA: Assessment of the quality of MedDRA coding in a sample of COVID-19 vaccine medication error data (paper been submitted)
- Medication Safety Officer Project and ISMP
- ISMP Interactions: COVID 19 Vaccination; Oxytocin
- Activities locally: India, Morocco, Middle East, UK, Ireland, LATAM
- Ergonomics/ Human Factors in medication Errors: Systems approach to labelling

Importance of collaborations

- ISOP has recently joined

Liaison with Safe Anaesthesia Liaison Group

Angela Caro

World
Patient
Safety Day
2020

Input into statement about peri-operative safe use of medicines

The screenshot shows the SALG website with a green header containing logos for RCoA, Association of Anaesthetists, NHS Improvement, and SAFE. Below the header is a large image of surgeons in an operating room. A left-hand navigation menu lists: Home, Who we are, Patient Safety Updates, National Patient Safety Alerts, SALG-BIDMC Fellowship, SALG Publications, Report a Patient Safety Incident, Device and Drug Alerts, Events, and Contact Us. The main content area is titled 'Safe Anaesthesia Liaison Group (SALG)' and includes a paragraph about the group's purpose. Below this are two smaller images: 'Patient Safety Updates' and 'Report a Patient Safety Incident'. At the bottom left is the hashtag #salgpatisntsafety.

This screenshot shows the 'Patient Safety Updates' section. It features a header image of surgeons. Below the image is a navigation menu with: Home, Who we are, Patient Safety Updates (highlighted), National Patient Safety Alerts, SALG-BIDMC Fellowship, SALG Publications, Report a Patient Safety Incident, Device and Drug Alerts, Events, and Contact Us. The main text area is titled 'Patient Safety Updates' and contains several paragraphs explaining the group's mission and the purpose of the updates. It lists updates for 2019, 2018, 2017, and 2016, each with links to PDFs and presentations. At the bottom left is the hashtag #salgpatisntsafety and a Twitter icon.

The Healthcare Safety Investigation Branch (HSIB) conducts independent investigations of patient safety concerns in NHS-funded care across England.

Most harm in healthcare results from problems within the systems and processes that determine how care is delivered. Our investigations identify the contributory factors that have led to harm or have the potential to cause harm to patients. The recommendations we make aim to improve healthcare systems and processes in order to reduce risk and improve safety.

Our organisation values independence, transparency, objectivity, expertise and learning for improvement.

We work closely with patients, families and healthcare staff affected by patient safety incidents, and we never attribute blame or liability to individuals.

Our investigations

Our team of investigators and analysts have diverse experience working in healthcare and other safety critical industries and are trained in human factors and safety science. We consult widely in England and internationally to ensure that our work is informed by appropriate clinical and other relevant expertise.

We undertake patient safety investigations through two programmes.

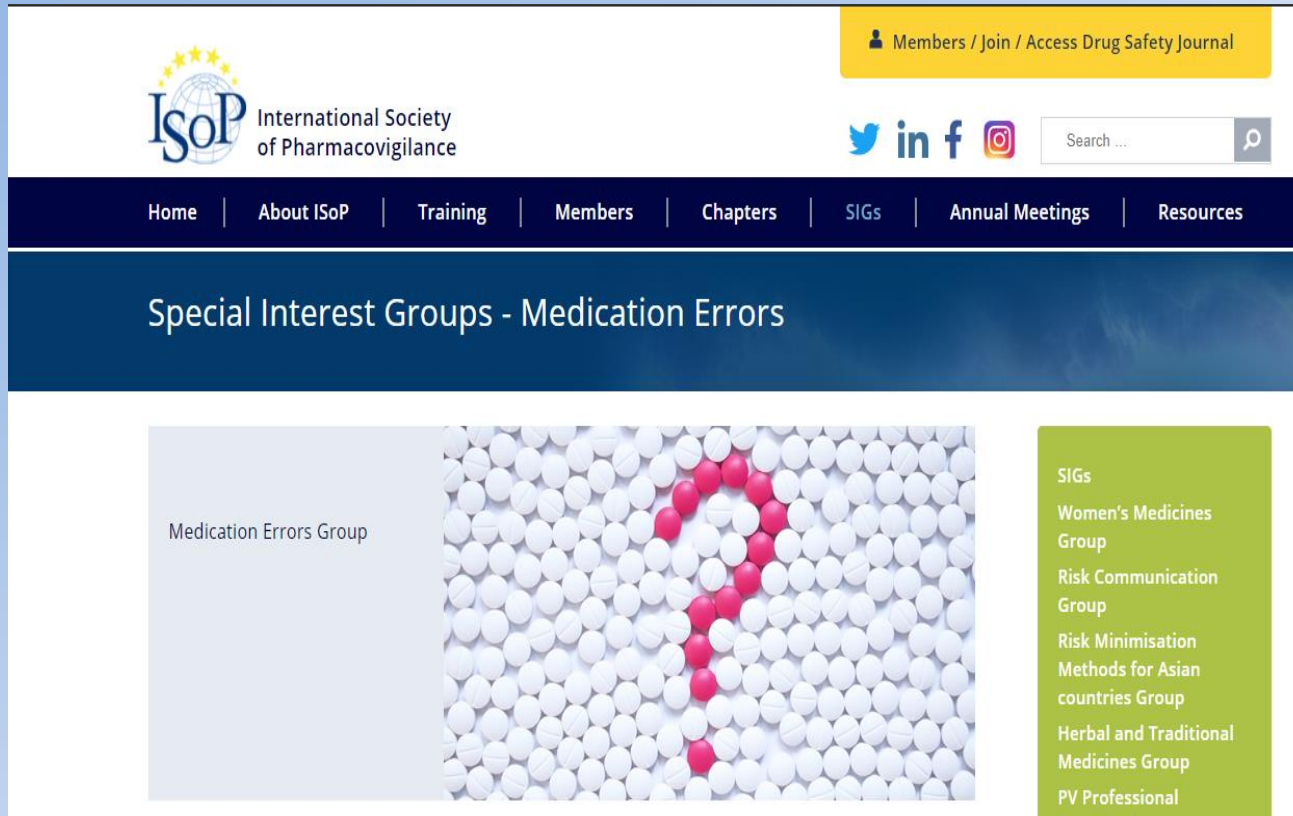

National investigations

World
Patient
Safety Day
2020

The logo for World Patient Safety Day 2020 features a stylized globe with a grid of latitude and longitude lines. Above the globe, a series of yellow stars are arranged in a semi-circular arc. Overlaid on the right side of the globe is the text 'ISoP' in a large, dark blue, serif font.

“Understanding the interactions between people and all other elements within a system, and design in light of this understanding.”

(Wilson, J. 2014. Fundamentals of systems ergonomics/human factors. Applied Ergonomics, 45:5-13)

● Vision

Make it easier for people to do their work, and optimise human performance within the manufacturing pharmaceutical sector and systems to support patient outcomes

● Goals

Collaborate as an experienced community of practice. Share meaningfully how human performance capability delivers value for all

Connect and engage key stakeholders including patients, manufacturers, suppliers and regulators to include human performance in strategies and approaches.

● Values

Create a diverse and inclusive learning group across sectors and disciplines including Industry, Academia, Consulting experts, CIEHF

Engage to make concepts and language more accessible and inclusive to promote application in existing systems for everyone
